RESEARCH REPORTS AND ARTICLES

313452

Subject Index

PAGE

Acetylation of Silk Fibroin by the Action of Ketene 103
Adsorption of Oxygen by Mercerized Cotton 133
Brief on Wool Top Standards 197
Comparison of Three Methods for Determining the Breaking Strength of Cotton Fibres 145
Cotton Quality Determination by Application of Certain Chemical Methods 165
Critical Study of Cotton Manufacturing Processes 241
Discussion of Paper on Drying Problems in Other Industries 127
Formaldehyde as a Protective Agent for Wool ... 175
Incline Plane Yarn Testing 211
Measurement of Color of Dyed Textiles 5
Microbiology of Textile Fibres. VI, VII .. 413, 445
Moisture Adsorption in Cotton and Other Fibrous Insulating Materials: A Proposed Explanation 229, 289
Needle Type Thickness Gauge 327
Outline of Some Fundamentals of Textile Physics 24
Serviceability of Fabrics in Regard to Wear 381
Simplified Trapezoid Tearing Test 208
Structure of Cellulose 453
Textile Fibres in the Light of Modern Science 271, 310
Torque Relaxation and Torsional Energy in Crêpe Yarn 83
Unshrinkable Wool Process 349
Wool Top Standards 195
X-ray Analysis of Textile Fibres 425

ABSTRACTS

Subject Index (Cross-Indexed)

PAGE

A

Able Research Group 372
Absorption Edges in the X-ray Patterns of Native and Mercerized Cellulose 298
of Dyes by Cellulose 219
by Staple Fibre: Quantitative Determination of 261
of Phenols and Phenol Carboxylic Acids by Cellulose 394
Absorptive Ability of Cellulose Materials 258
Properties of Artificial Fibres 257
Accuracy in Cloth Length Measurement 331
Acetate and Viscose Yarn Relations 182
Effects on Cotton Cloth 155
Fabrics: Printing of 260
-Rayon Crêpes 357
Dyeing of 395
—and Acetate Spun Rayon 467
Semi-Wool Together with 156
Saponification of 400
Single-bath Fast Dyeing for Union Fabrics Containing 400
Stretching of—as a Means for Improving Its Properties 217
The Ultimate 331
Warp Yarns: Comparison of 111
Yarn: Manufacture and Properties of 30
Yarns: Bright and Dull 252
Acid and Alkaline Degradation of Chlorinated Wool 154
Colors: Dyeing Piece Goods with 258
Degradation of Wool Keratin 154
Dyeing: Structure of Animal Fibres in Relation to 35
Dyes: Theory of Dyeing Wool with 115
Fulling of Cloths 187
Wool Dyes: Characteristics of—and Their Behavior During Dyeing 154
Acridine Dyes: Fluorescence of—on Silk and Rayon 189
Acrylic Resins 406
Adsorption Analysis of Vat Dyes 465
Measurement of Variation of Dielectric Constant of Water with Extent of Adsorption 120
of Caustic Soda by Cellulose 180
of Dyes at Liquid-liquid Interfaces 115
of Water by Wool. I–III 149
Adsorptive Capacity of Cellulose Material: New Method for Determination of Substantive Dyes in the Fibre and 258, 466
Adequate Humidity in Spinning 112
Aging of Castor Oil and Oil-mordant 219
Air Humidity: Influence of—on Spun Rayon Yarns 256

PAGE

Permeability of—and Moisture Through Impregnated Fabrics 186
of Fabrics: Study on the 299
Waterproof Fabrics 218
Albumin Condensates: Use of—in the Vat Dyeing of Wool 36
Alkali and Soap Solutions, Shrinkage in: Rayon and Staple Fibre Crêpe Yarns and Fabrics 399
Scouring of Wool Without 463
Soluble Cellulose Ethers: Permanent Sizing with 398
Alkalies: Action of—on Wool 367
Alkaline Products: pH Values of Some 221
Solutions: Dissolution of Chemically Modified Cotton Cellulose in 362
Alkalinities and Acidities in Sulfonated Oils: Determination of 339
Alkyl Groups on the Properties of Anthraquinone and Fluorescein Dyes: Effect of 394
Allwörden's Reaction and Halogenation of Wool 252
Alpha Grass, Linen, Cotton and Straw: Structure of Fibres of 330
Aluminum Chloride: Carbonization of Wool by .. 150
American Cotton Crop: Recent Developments in the Methods Used to Produce the 150
Amino Acids and Proteins: Reaction with Hypochlorites 372
Analysis of Wool for Fibre Diameter and Length: Comparative Examination of Methods of. I 468
Aniline Black: Dyeing Unspun Cotton with 396
Dyeing: Useful Precautions with One-bath 219
Dyeings 154
Resorption of—Through Textiles of Plant and Animal Origin 365
Animal Fibre: Oxidative Dyeing 301
Fibres: Reactivity of Sulphur Linkage in .. 214
Structure of—in Relation to Acid Dyeing 35
X-ray Structure 461
Hairs: Quantitative Analysis of Blends of .. 367
Anthraquinone Dyes 257
Anthrax Infection: Prevention of—in Woolen Textile Processing 180
Anti-crease Finishes: Formaldehyde Key Chemical for 397
Softening—on Cotton 400
Antimony Electrodes: Determination of pH Values by the Hydrogen and 38
Apparatus for Determining Average Length and Fineness of Cotton Hairs 304
for Testing Coated Fabrics 367
Fastness-to-light of Materials: New ... 469
Surface Tension Measurement 160

PAGE

Aqueous Emulsions: Dressing of Silk and Rayon with 156
Artificial Fibres: Causes, Treatment and Measurement of Creasing of Fabrics of 368
Method of Judging the Relative Efficiencies of Absorptive Properties of 257
Silk Weaves: Removal of Linseed Oil Finishes upon 260
Atmospheric Humidity and Yarn Regain: Relations Between 331
Automatic Control in Textile Industry: Use and Application of 261
pH Measurement Apparatus 372
Recording Twist Counter 367
Wool Dyeing 257
Auxiliary Reagents in the Textile Industry 257
Azo Dyes 155
Influence of Position Isomerism in—upon their Fastness to Light and Washing .. 398
New. II 257
on Raw Cotton: Use of 466
Preparation of—Derived from Nitroanilines 257
Azoic Colors: Chemistry of the Stabilized 366
Dyes: Reduction and Dispersion of—in Presence of Lissolamine A (ICI) 118

B

Bacteria, Mold and Insects: Destruction of Rayon by 32
Balloonless Ring Spinning 252
Barrier-layer Photoelectric Cell in Photoelectric Photometry 372
Bast Fibres: New Methods in Technology of ... 253
Problems in Industries Producing 462
Wool: Manufacture and Applications of 252
Bemberg Rayon: Suggestions for Dyeing and Finishing 188
Benzanthrone Series: Vat Dyes of the. XV 36
Benzo Fast Copper Dyes: Application of 155
Benzoxazole Dyes: Preparation and Tinctorial Properties of Certain 117
Benzol: Condensation of Cellulose with 406
Bleached (Textile) Goods: Difficulty in Removal of Lubricating Oil Spots from 399
Bleaches: Oxygen 117
Bleaching and Dyeing Conditions: Influence of—on Light Fastness of Dyed Cellulose Acetate Matt Silk 188
and Dyeing Rabbit Wool 257
and Finishing Industries: Recent Developments in the Cotton 338
Degumming, Weighting and Dyeing of Skeined Silk 156
Dyeing and Finishing of Linen 189
Effect of pH on Rate of Chlorine Consumption in 155
Fastness of Indanthrene Colors to 363
of Cotton Goods 337
Processes: Behavior of Mixture Fabrics of Cotton and Staple Fibre in Different .. 394
Suitability of Stainless Steel Compared with Other Metals in 401
Tendering Titanium Oxide Delustered Rayon 222
Bleached Woven and Knitted Cotton Fabrics Changing to Yellow 183
Borax-Boric Acid Fireproofing Agents: Efficiency 253
Bradley Kinetic Warp Let-off Motions 112
Breaking Strength of Cotton Yarns: Determining 261
of Fibres: Testing the Flexure 37
up Wool into its Histological Components .. 251
British and Japanese Textile Production Costs: Comparison 373

PAGE

C

Cakes as Yarn Supply for Viscose Crêpe 253
Calcium and Magnesium Ions: Colloid Action of Textile Assistants in Presence of 301
Thiocyanate: Use of—for Determination of Proportions of Different Textiles in Mixtures in Presence of Oxy- and Hydrocellulose 157
Calculating the Standard Deviations of Observations: Abbreviated Method and a Suggested Cheap Mechanical Device for 368
Calendering or Drying of Materials 40
Calibration of a "Constant Rate of Loading" Machine for Testing the Tensile Properties of Textiles 368
Capillarity: Influence of—upon the Dyeing of Textiles 337
Carbohydrates and Polysaccharides: Studies on Reactions Relating to. I 180
Carbonization of Wool by Aluminum Chloride ... 150
Carbonizing of Wool 357
"Carnofil" and "Marena" Fibres 213
Casein Silk 213
Textile Material: Lanital 355
Wool 180
Castor Oil and Oil-mordant: Ageing 219
Catalysts and Cloth Oils in Mackey Test 357
Catalytic Action upon Wool 303
Cause, Prevention and Removal of Spots in Textile Products 434
Caustic Potash vs. Caustic Soda 337
Soda: Adsorption of—by Cellulose 180
Cellulose: Absorption Edges in the X-ray Patterns of Native and Mercerized 298
Absorption of Dyes by 219
of Phenols and Phenol Carboxylic Acids by 394
Acetate Fibres: Dyeing 188
Matt Silk: Influence of Bleaching and Dyeing Conditions on Light Fastness of Dyed 188
Rayon: Improvements in Dyeing and Printing of 155
Tenacity of—in Various Forms 34
Why Direct Dyes Color 257
Adsorption of Caustic Soda by 180
and Starch: Molecular Structure 373
Colloidal Aspects of 30
Condensation of—with Benzol 406
Crystal Structure 461
Degradation of Fibre Molecules of—by Grinding 214
Derivatives 181
Dielectrics: Residual Moisture in 182
Dispersion of Native and Hydrated 262
Dyeing of—with Direct Dyes 363
Ester Solutions: Determination of Specific Weight of 406
Evaluation of Chemical Tendering of—by Cellulose Viscosity Measurement 394
Fibre-damaging Action of Vat Dyes on 157
Fibres: Influence of Organic Acids on 398
X-ray Studies of Crystallite Orientation in 182
Finish: New 258
Hydrophilic Properties of 397
Hygroscopic Moisture of 119
Hypochlorite Oxidation of—in Presence of a Reduced Vat Dye 259
Importance of Clearing Up the Constitution of—for Synthetic Fibre Industry 181
Influence of Natural Admixtures in—on the Dyeing Properties of Cotton Fibre 467
Materials: Further Notes on Tendering and Fading of—on Exposure 258

PAGE

New Method for Determination of Substantive Dyes on the Fibre and Absorptive Ability of 258, 466
Mercerization of 116
Micellar Structure as Related to 31
Modifications of 30
Molecular Structure of 151
Weights of 252
Solvents and Their Use in Finishing 301
Structure 111, 373
True Density of 150
X-ray Spectrography on Morphology of 463
Celluloses: Degree of Polymerization of Natural and Technical 330
Homogeneity of Native—and Their Derivatives 181
Cellulosic Fibres: Mechanical Properties of Natural and Mercerized 355
Sensitizing Action of Vat Dyes on Degradation of—by Light 118
Textile Fibres: Dyeing of 395
Chain Polymerization: Kinematics of—of Pure Styrene by Heat 407
Chemical and Mechanical Advances in Dyeing Methods 468
and Physical Properties of Wool 111
and Textile-chemical Investigation of Textile Assistants and Dyes 258
Changes Hold Great Future 301
Constitution of Raw Silk. I–III 251
Damage to Fibres Checked 301
Reactions: Identification of Textile Fibres by Involved in Chroming, and Their Result for Distinguishing Various Fibrous Materials 370 301 157
Reagents: Heat Resistance of Silk Fibre Treated with Various 397
Research Laboratory: What the—is Doing .. 469
Studies of Silk Fibroin. II, III 466
Tests for Textiles 434
Treatment of Jute 339
Chemicals: New Dyes and 338
Chemistry: Influence of Changes in Field of—on Evolution of Textile Research and the Industrial Textile Evaluation 437
of Dyes: Review of 466
of Silk and Silk Processing: Developments During 1935 in the 183
of Some Newer Textile Assistants 258
Widens the Textile Market 301
Chlorination of Wool 466
Study of Wool 438
Chlorine Bleach Liquors: Stability of 258
Studies of the 258, 337
Effect of pH on Rate of—Consulption in Bleaching 155
Simplified Method for Rapid Determination of Available—Content of Pulp Bleaching Solutions 38
Chlorinated Wool: Acid and Alkaline Degradation of 154
Chromates: Do—Damage Wool? 367
Chromatographic Adsorption Analysis: Fractionation of Highly Polymerized Materials Through the 406
Chroming: Chemical Reactions Involved in—and Their Result 301
Chromium Compounds: Toxicology of—Used in Dyeing 302
Salts: Mordanting of Silk with 221
Cloth and Yarn Drying: Control in 357
Deformation of—Under Stress 358
Drying Machine: Controlled Shrinkage 332
Requirements Which Govern Expense .. 299
Length Measurement: Accuracy in 331

PAGE

Oils and Catalysts in the Mackey Test: Oxidation of Olive Oil 357
Structure: Geometry of 388
Testing the Resistance of—to Bending 222
Cloths: Acid Fulling of 187
Methods of Setting 391
Coated Fabrics: Apparatus for Testing 367
Use of Suitable Equipment Simplifies Production of 332
Colloid Action of Textile Assistants in Presence of Calcium and Magnesium Ions 301
Chemical Behavior of Wool 433
Mill in the Paper Industry 187
Particles: Influence of an Electric Field on Intensity of Tyndall Light from 373
Colloidal Aspects of Cellulose 30
of Dyestuffs 466
Systems: Structures and Forces in 375
Colloresin DK in the Printing Industry 155
Color and Dyeing Properties of Mono Azo Dyes: Influence of Position Isomerism on 301
Deviation in Piece Dyed Rayon Fabrics 402
-fastness: New Methods of Improving 301
in Textile Materials. I 361
Measurement in Textiles 118
Physical Basis of 408
Standardized Basis for 219
Measuring—in Manufactured Goods 390
of Dyed Textiles: Measurement of 158
Problems: Applicability of Spectrophotometry to Solution of—in Textile Industry 401
in Paper Industry: Recent Progress ... 192
Specification: Munsell System of 259
Colorimeter: New Type of 402
Colorimetry with a Spectrometer 402
Colors: How can—Which are too Deep be Corrected? 219
Stripping of 401
Commercial Soaps and Soap Products: Standard Methods for the Sampling and Analysis of—Revised 368
Weight of Textile Fibres 298
Comparative Gloss Meter 402
Compressibility and Softness of Textiles 261
Compression of Wool by Twist 357
Condensation of Cellulose with Benzol 406
of Dyes in (Textile) Fibres 187
Conditioning: Cotton Yarn 253
Continuous Piece-goods Carbonizing Machine ... 332
Contraction in Synthetic Yarns 332
in Twisted Viscose Yarns 299
Control of Processing: "Multelec" Recorder .. 190
Controlled Shrinkage Cloth Drying Machine 332
Controllers and Regulators 374
Conversion of Waste Flax Straw into Linen Fibre: Gibb System for 213
Copper: Determination of Small Quantities of—in Textile Fibres and Weaves 158
Investigation of Allowable Content of—in Fabrics for Waterproofing 218
Soaps: Preservation of Fishing Nets with .. 186
Cops and Bobbins: Density 434
Corn Sugar: Use of—in Viscose Rayon Manufacture 34
Cotine Fibre: Production and Properties 298
Cotton and Linen: Nitrogen Compounds of 31, 387
and Rayon Grey Goods: Oil Stain Removers on 398
and Spun Rayon: Problem of Mercerization of Mixed Fabrics 364
and Spun Yarn Quality in Weaving 358
and Staple Fibre Mixtures: Mercerization .. 339
and Staple Fibre Yarn: Comparative Mechanical-physical Investigations with ... 304
and Staple Rayon: Problem of Mercerization of Mixed Fabrics from 189

PAGE

and Viscose Characteristics 358
and Wool: Comparison of Dyeing of 396
Dyeing Properties of 258
Bleaching and Finishing Industries: Recent Developments in the 338
Cellulose in Alkaline Solutions: Dissolution of Chemically Modified 362
Classer's Microscope: Determining the Maturity of Cotton by Use of the 332
Cloth: Interesting Acetate Effects on 155
Strength: Variability of 361
Constitution and Affinity of—for Disazo Dyes from Substituted Diaminodiphenyls 466
Crop: Recent Developments in Methods Used to Produce the American 150
Cuticle of 214
Drier: Vertical—Makes Better Staple 111
Drying of 183
Dyeing, Application of Pringhseim's Rule .. 338
of—and Rayon to be Rubberized 220
Unspun—with Aniline Black 396
Dyes 466
Fast Direct 157
Identification of—on the Fibre 187
Effect of Jute on Spinning Value of 255
Fabric: Density Determination 438
Fabrics: Effects of Laundry Methods on 463
Ironing as a Factor in Deterioration ... 255
Kier Bleaching of—with Sodium Peroxide 116
Tests on Unused and on "Worn-out" Plain-weave 463
Treating—to Produce Permanent Finishes 365
Use of Viscose Solutions in Treating—to Produce Permanent Finishes 186
Fibre: Influence of Heat and Humidity on 30
Influence of Natural Admixtures in Cellulose on Dyeing Properties of 467
Maturity: Micro-determination of—in Polarized Light 158
Structure of 387
Fibres: Degree of Maturity, Determination 30
Injury of—by Salts 116
Goods: Bleaching of 337
Examining Mildew in 299
Improved Method for Examination of—Spotted with Mold 464
Grading Raw 119
Hair Primary Substance: X-ray Diagram and Constitution 462
X-ray Investigation During Growth 354
Hairs: New Method and Apparatus for Determining Average Length and Fineness 304
Improvement of Luster of—without Mercerization 339
Materials: Laboratory Methods for Desizing 464
Measurement of Fluidity of—in Cuprammonium Solution 370
Mixture Yarns and Fabrics: Quantitative Determination of Staple Fibre in 223
Organizations: Trial and Error Necessary to Some Extent in Calculating 332
Reaction for Detecting Dyeings on 220
Samples: Spinning Procedure for 464
Size Mixings 358
Slashing and Warp Preparation 333
Moisture-control Device Applied to 390
Softening Action of Vat Dyes on 156
Anti-crease Finishes on 400
Spinning: Roller Settings and Twist in 216
Weight Uniformity in—Preparation 113
-staple Fibre Mixture Yarns: Mercerization 362
Straw, Alpha Grass and Linen: Structure of Fibres of 330
System: Rayon Staple on 464
Textile Problem 263
